O-O (1:1)

Cross Section O View

Cross Section O Right View

Bolt the leadscrew disc onto leadscrew slider
(And do the same thing for the other side)

Attaching leadscrew slider to leadscrew stepper motor Scale 1:2

Twist leadscrew slider onto leadscrew

Slide leadscrew mount onto end of leadscrew

Title Daniel Shen Warehouse Gantry Project		
Created by [REDACTED]		
All Dimensions are in mm unless otherwise specified		
Scale as indicated on individual sections	Sheet Size A3	Sheet 30/45

Attaching Left Gantry to Wall

	Title Daniel Shen Warehouse Gantry Project			
	Created by [REDACTED]			
	All Dimensions are in mm unless otherwise specified			
	All drawings are to this scale unless otherwise specified	Scale 1:2	Sheet Size A3	Sheet 31/45

Mounting V-Groove Wheels

Isometric View

Right View

Right View

Note the spacer is designed very small so it only makes contact with the static (not moving) part of the v-groove to minimise friction and thus improve slideability. Similarly, the bolt head only contacts the static part as well, but should avoid overtightening the bolt for best performance

Nut and bolt the v-groove

Repeat for all v-grooves

Title Daniel Shen Warehouse Gantry Project			
Created by [REDACTED]			
All Dimensions are in mm unless otherwise specified			
All drawings are to this scale unless otherwise specified	Scale 1:1	Sheet Size A3	Sheet 32/45

Mounting Linear Servo

First, slide the linear servo spacers into place so their holes align

Right View

Right View

Finally, nut and bolt the top of the linear servo and mounting bracket onto the central slider, securing the linear servo in place.

Right View

Then slide the mounting bracket over the linear servo, align with spacer and central slider holes.

Slide the linear servo from the top through the hole on the central slider

Isometric View

Title Daniel Shen Warehouse Gantry Project			
Created by [REDACTED]			
All Dimensions are in mm unless otherwise specified			
All drawings are to this scale unless otherwise specified	Scale 1:2	Sheet Size A3	Sheet 33/45

Mounting Belt

2

Isometric View

The ends of the belt should go through the central hole of the front most clamp

Clamp onto the belt on both sides with the belt clamps

Then bolt to the previously placed threaded inserts to tighten and secure in place

Right View

1

First, insert the threaded inserts

Right View

3

Top View

Detailed View Q

Note the special multi-radii design to accommodate the head of the threaded insert, the grippy part, and the end of the bolt. Dimensions depicted in detailed view F on sheet 18.

The belt clamps are bolted to the central slider using the threaded inserts.

P-P (1:2)

Cross Section P View

	Title Daniel Shen Warehouse Gantry Project			
	Created by [REDACTED]			
	All Dimensions are in mm unless otherwise specified			
	All drawings are to this scale unless otherwise specified	Scale 1:2	Sheet Size A3	Sheet 34/45

Mounting T-Bar to Wall

Bolt the T-Bar to the wall with spacer

Isometric View
Scale 1:5

Front View

	Title Daniel Shen Warehouse Gantry Project			
	Created by [REDACTED]			
	All Dimensions are in mm unless otherwise specified			
	All drawings are to this scale unless otherwise specified	Scale 1:2	Sheet Size A3	Sheet 35/45

Attaching Poles

Top View

The ends of the pole should be threaded

Insert the pole in the socket

Then bolt it on

The bolt can be as long as the threaded section of the pole, longer bolts improve stability slightly.

Optionally, can insert a threaded insert and bolt or set screw here to further tighten rod but is not nesecary

The auxiliary pole sockets do not have this option

R-R (1:1)

Front View

	Title Daniel Shen Warehouse Gantry Project			
	Created by [REDACTED]			
	All Dimensions are in mm unless otherwise specified			
	All drawings are to this scale unless otherwise specified	Scale 1:1	Sheet Size A3	Sheet 36/45

Mounting D-Shaft Stepper

Secondly, insert the threaded inserts into the stepper mount

And bolt the stepper mount to the stepper motor in the same way shown on sheet 29

Front View

Move the stepper motor down so that it rests on the v-groove nuts or hovers slightly above

Make sure to stick the electrical socket through the hole on the Slider

The side of the stepper should be right up against the pole bolts

Finally, bolt the mount to the side of the T-Bar Slider using the threaded inserts

Fourthly, bolt the stepper mount and motor to the T-Bar Slider through the two nuts

After assembling, simply slide onto T-Bar

The oblong slot shape, along with the use of a bottom nut rather than a solid spacer allows height adjustability

Bolt screws into threaded insert

Detailed View T

Thirdly, add nuts to the top and bottom of the attachment holes

Isometric View

First mount the v-groove wheels the same way as shown on sheet 32

Front View
(The poles have been hidden)

S-S (1:2)

Title Daniel Shen Warehouse Gantry Project			
Created by [REDACTED]			
All Dimensions are in mm unless otherwise specified

All Dimensions are in mm unless otherwise specified			
All drawings are to this scale unless otherwise specified	Scale 1:1	Sheet Size A3	Sheet 38/45

Mounting Servo and Claw Poles

Isometric View

Bolt securing side body to main frame

Top View

Optional set screw / threaded insert hole to tighten upper rod, not nesecary due to tight friction the rod has with the main frame

Front View

First, insert servo into servo shaped hole

Then, slide in side body behind servo's left mounting bracket

And bolt to main frame

Slide rods through rod holes, it'll be a tight fit so consider using a vice grip to help

Finally, bolt servo to frame

Top View

	Title Daniel Shen Warehouse Gantry Project			
	Created by [REDACTED]			
	All Dimensions are in mm unless otherwise specified			
	All drawings are to this scale unless otherwise specified	Scale 1:1	Sheet Size A3	Sheet 39/45

Mounting Arms onto Main Frame

Try loosening the joint bolts to give the structure a bit more bend to it, or take it off and re-bolt it once arms are on

Once both arms are on the poles, attach the horn to the servo by pressing on it against the servo head

Title Daniel Shen Warehouse Gantry Project			
Created by [REDACTED]			
All Dimensions are in mm unless otherwise specified			
All drawings are to this scale unless otherwise specified	Scale 1:1	Sheet Size A3	Sheet 40/45

Mounting Color Sensing Platform

Let "CSP" = Color Sensing Platform

Isometric View

Wood base is hidden
